

# MATT GABOR

## EXPERIENCE

### Apple: Front End Software Engineer

May 2017 - Present

- Utilized **React**, **Redux**, and **Javascript** to build a data-driven application impacting all of Apple.
- Fetches and queries data from REST APIs using **fetch** and **redux-saga** for side effect management.
- Worked on an **Agile (Scrum)** team with biweekly deliverables and strict deadlines.
- Collaborated with a team of backend engineers, product managers and data scientists to translate prototypes and concepts into high quality code.

### Apple: Software Engineering Intern

Summer 2015 & Summer 2016

- Completed two internships building iOS Applications using **Swift** and **Cocoa**.
- Created a RESTful API using **Node.js**, **MongoDB**, and **Express** to query manufacturing data.
- Completed two fully functional prototype in three month intervals, including backend services.

### StockJoust - Co-founder & Web Developer

August 2014 - June 2015

- Assisted development of a web app using **Node.js** and **MongoDB**.
- Developed the application's front-end using **HTML**, **CSS**, and **JavaScript**.

## PROJECTS

### WriteRight

January 2017

- Created a web app that helps ESL learners to improve their writing skills.
- Built with **Javascript**, **Express**, **Node.js**, and **Chart.js**.

### Handshake

October 2015

- Built an Apple Watch app that helps users remember people's names after shaking hands.
- Built with **Swift**, **WatchKit**, **Objective-C**, and **Parse**.

### Speak Up

April 2015

- Wrote a public speaking improvement app with personality insights and recommendations.
- Built with **Node.js**, **Express**, and **IBM Watson**.

## AWARDS

### HackDavis Winner - Best Educational Hack

August 2015

- Selected as the number one team amongst 700+ students solving problems for social good.
- Demoed WriteRight to an audience of judges, participants, and professors.

### iContest Finalist

August 2015

- Selected as one of four teams to present an app to Apple's VP of Software Engineering.
- Placed in the top teams during the 2015 iContest, Apple's intern hackathon.

### LA Hacks Finalist

April 2015

- Placed in the top 10 teams at one of the world's largest intercollegiate Hackathons.
- Winner of IBM Bluemix prize for integrating Watson APIs into our app.

## EDUCATION

### University of California, Davis

**Major** Computer Science

**Minor** Technology Management

**Graduated March 2017**, GPA 3.4/4.0

**Deans' Honor List** Winter & Spring 2016

## SKILLS

### Programming Languages

Advanced: **JavaScript (ES6)**, **Swift**

Intermediate: **C++**, **Python**, **SQL**

Familiar: **Objective-C**, **SQL**

### Frameworks & Tools

React, Redux, GraphQL, D3, Node.js,  
Express, Styled Components, Sass/Scss,  
Webpack, Jest, Cypress, eslint, AWS,  
Sketch, RESTful APIs, HTML, CSS
